# Software Installation

Dr. LIAW Hwee Choo

Department of Electrical and Computer Engineering

DigiPen Institute of Technology Singapore

HweeChoo.Liaw@DigiPen.edu

## Software Installation

### ST-Link Utility (STSW-LINK004) and ST-Link USB Drivers (STSW-LINK009)

- This utility is for programming STM32 microcontrollers, and the file (**en.stsw-link004\_v4.6.0.zip**) can be downloaded from <https://www.st.com/en/development-tools/stsw-link004.html>
- Unzip and run “\STM32 ST-LINK Utility v4.6.0\setup.exe” to install the ST-Link utility at the default location:  
**C:\Program Files (x86)\STMicroelectronics\STM32 ST-LINK Utility**
- This utility will also install two USB device drivers, namely  
[STMicroelectronics \(WinUSB\) STLinkWinUSB \(06/08/2017 2.01\)](#)  
[STMicroelectronics \(usbser\) Ports \(06/08/2017 2.01\)](#)
- The above USB drivers can also be obtained from <https://www.st.com/en/development-tools/stsw-link009.html>
- Download and unzip **en.stsw-link009\_v2.0.2.zip**, and
- Run “**stlink\_winusb\_install.bat**”, which will install the latest USB drivers

# Software Installation

## 1. The Development Software – STM32CubeIDE

- **STM32CubeIDE** is an all-in-one multi-OS development tool, which is part of the STM32Cube software ecosystem.
- **STM32CubeIDE** is an advanced C/C++ development platform with [peripheral configuration](#), [code generation](#), [code compilation](#), and [debug](#) features for STM32 microcontrollers. It is based on the ECLIPSE CDT framework and GCC toolchain for the development, and GDB for the debugging. [Eclipse CDT: \(C/C++ Development Tooling\)](#)
- <https://www.st.com/en/development-tools/stm32cubeide.html>  
**Windows: en.st-stm32cubeide\_1.9.0\_12015\_20220302\_0855\_x86\_64.exe.zip**

## Software Installation

- Create folders **C:\STM32CubeIDE\Repository** and **C:\STM32\_CS397**
- Unzip and run "**st-stm32cubeide\_1.9.0\_12015\_20220302\_0855\_x86\_64.exe**" to install it with default settings
- Run **STM32CubeIDE**, select workspace: **C:\STM32\_CS397**, and click "Launch"

click

work folder

RN0114

Release note will be displayed in the first run

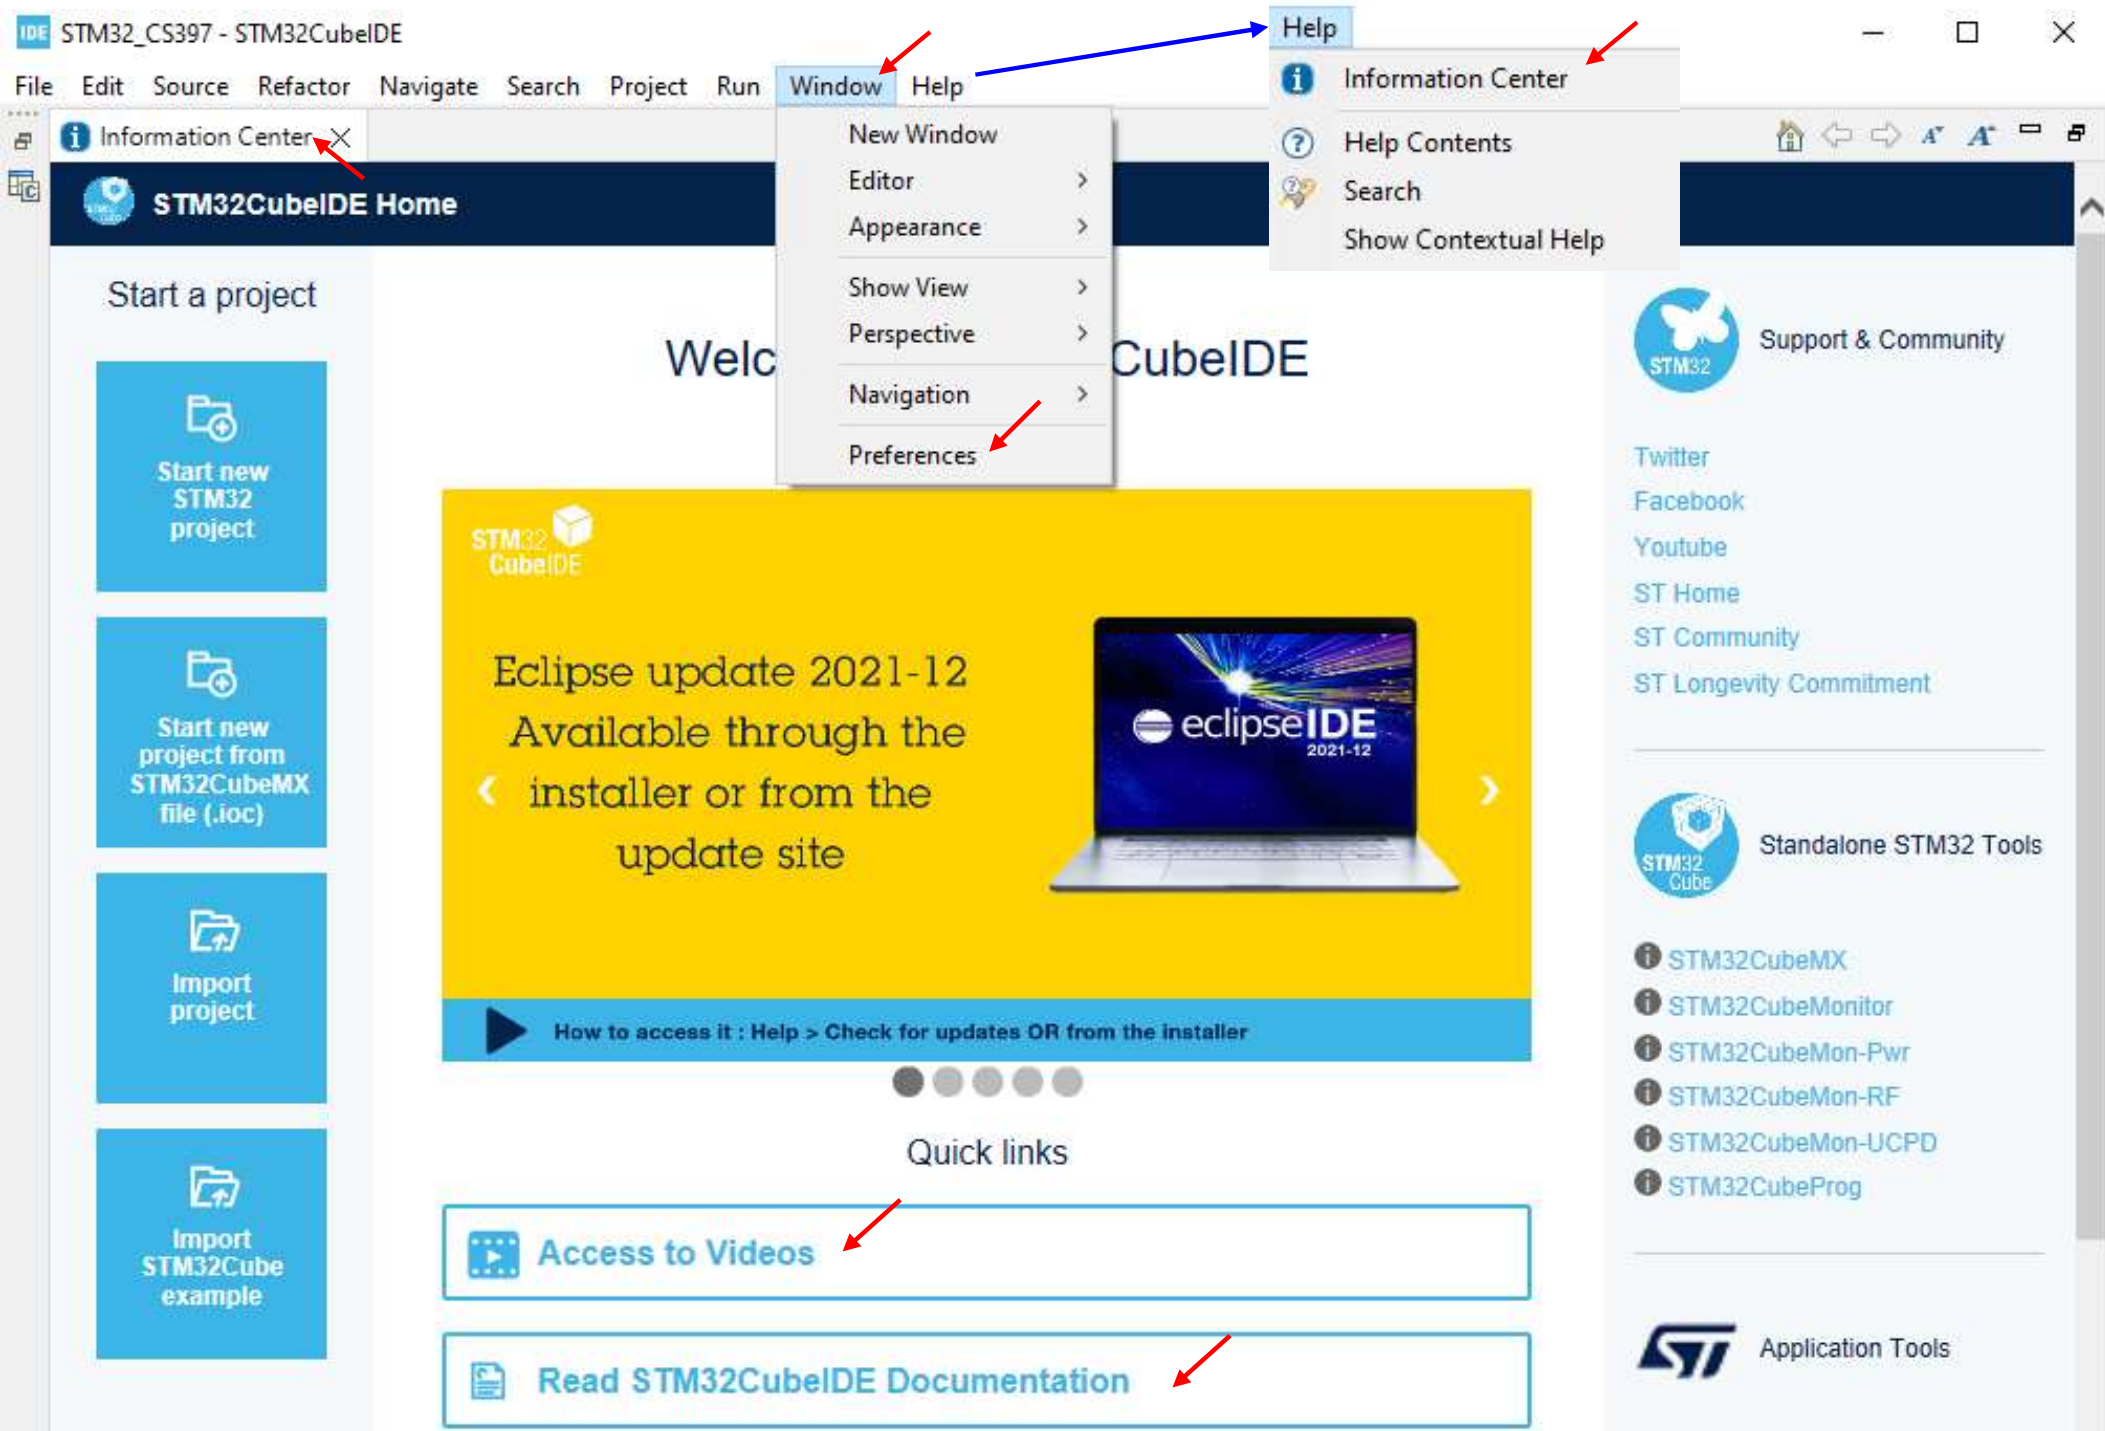

Release note

STM32CubeIDE release v1.9.0

### Introduction

This release note is updated periodically to keep abreast of **STM32CubeIDE** evolution, problems, and limitations. Check the STMicroelectronics website at [www.st.com/stm32softwaretools](http://www.st.com/stm32softwaretools) for the latest version. For the latest release summary, refer to

- Select: Window -> Preferences (for firmware installation)

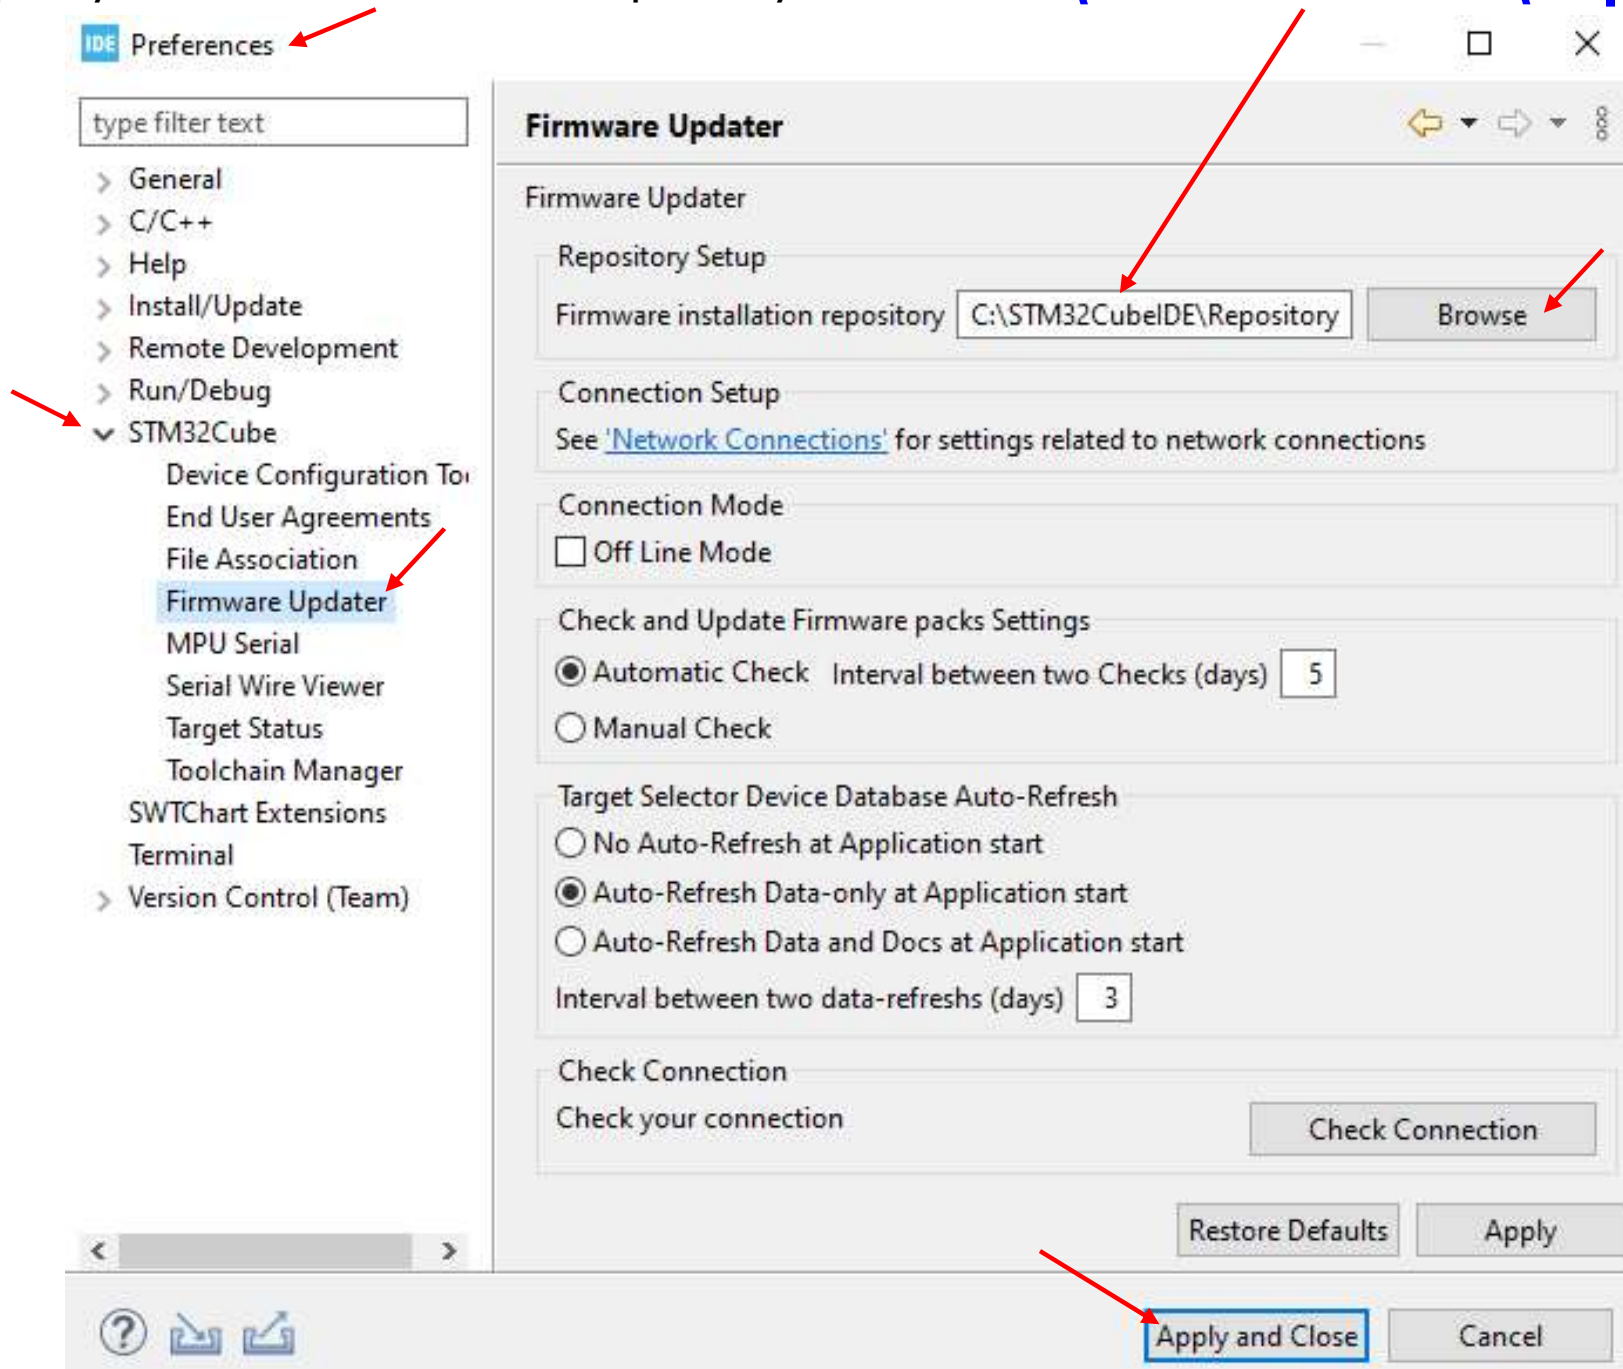

# Software Installation

- Specify Firmware Installation Repository

**C:\STM32CubeIDE\Repository**

# Software Installation

- Manage Embedded Software Packages

The screenshot displays the STM32CubeIDE interface. The top menu bar includes File, Edit, Source, Refactor, Navigate, Search, Project, Run, Window, and Help. The left sidebar shows the Information Center and STM32CubeIDE Home. The main workspace displays a 'Welcome to STM32CubeIDE' message and a 'Start a project' section with three options: 'Start new STM32 project', 'Start new project from STM32CubeMX file (.ioc)', and 'Import project'. A large blue banner in the center reads 'Video tutorials Available through the new video browser'. A yellow banner at the bottom states 'How to access it : Help > Information Center > Access videos'. The Help menu is open, showing options like 'Check for Updates', 'Install New Software...', 'Eclipse Marketplace...', 'Check for Target Selector Device Database Updates', 'Check for Embedded Software Packages Updates', 'Manage Embedded Software Packages', 'Target Device Docs and Resources', 'ST-LINK Upgrade', and 'About STM32CubeIDE'. A 'Data Refresh' dialog box is also visible, showing 'MCUs, Boards & Examples Data Refresh' and 'Download all Documents' buttons. Red arrows point to the 'Help' menu, the 'Check for Updates' option, the 'Manage Embedded Software Packages' option, and the 'REFRESH' button in the 'Data Refresh' dialog.

**Install MCU Package**

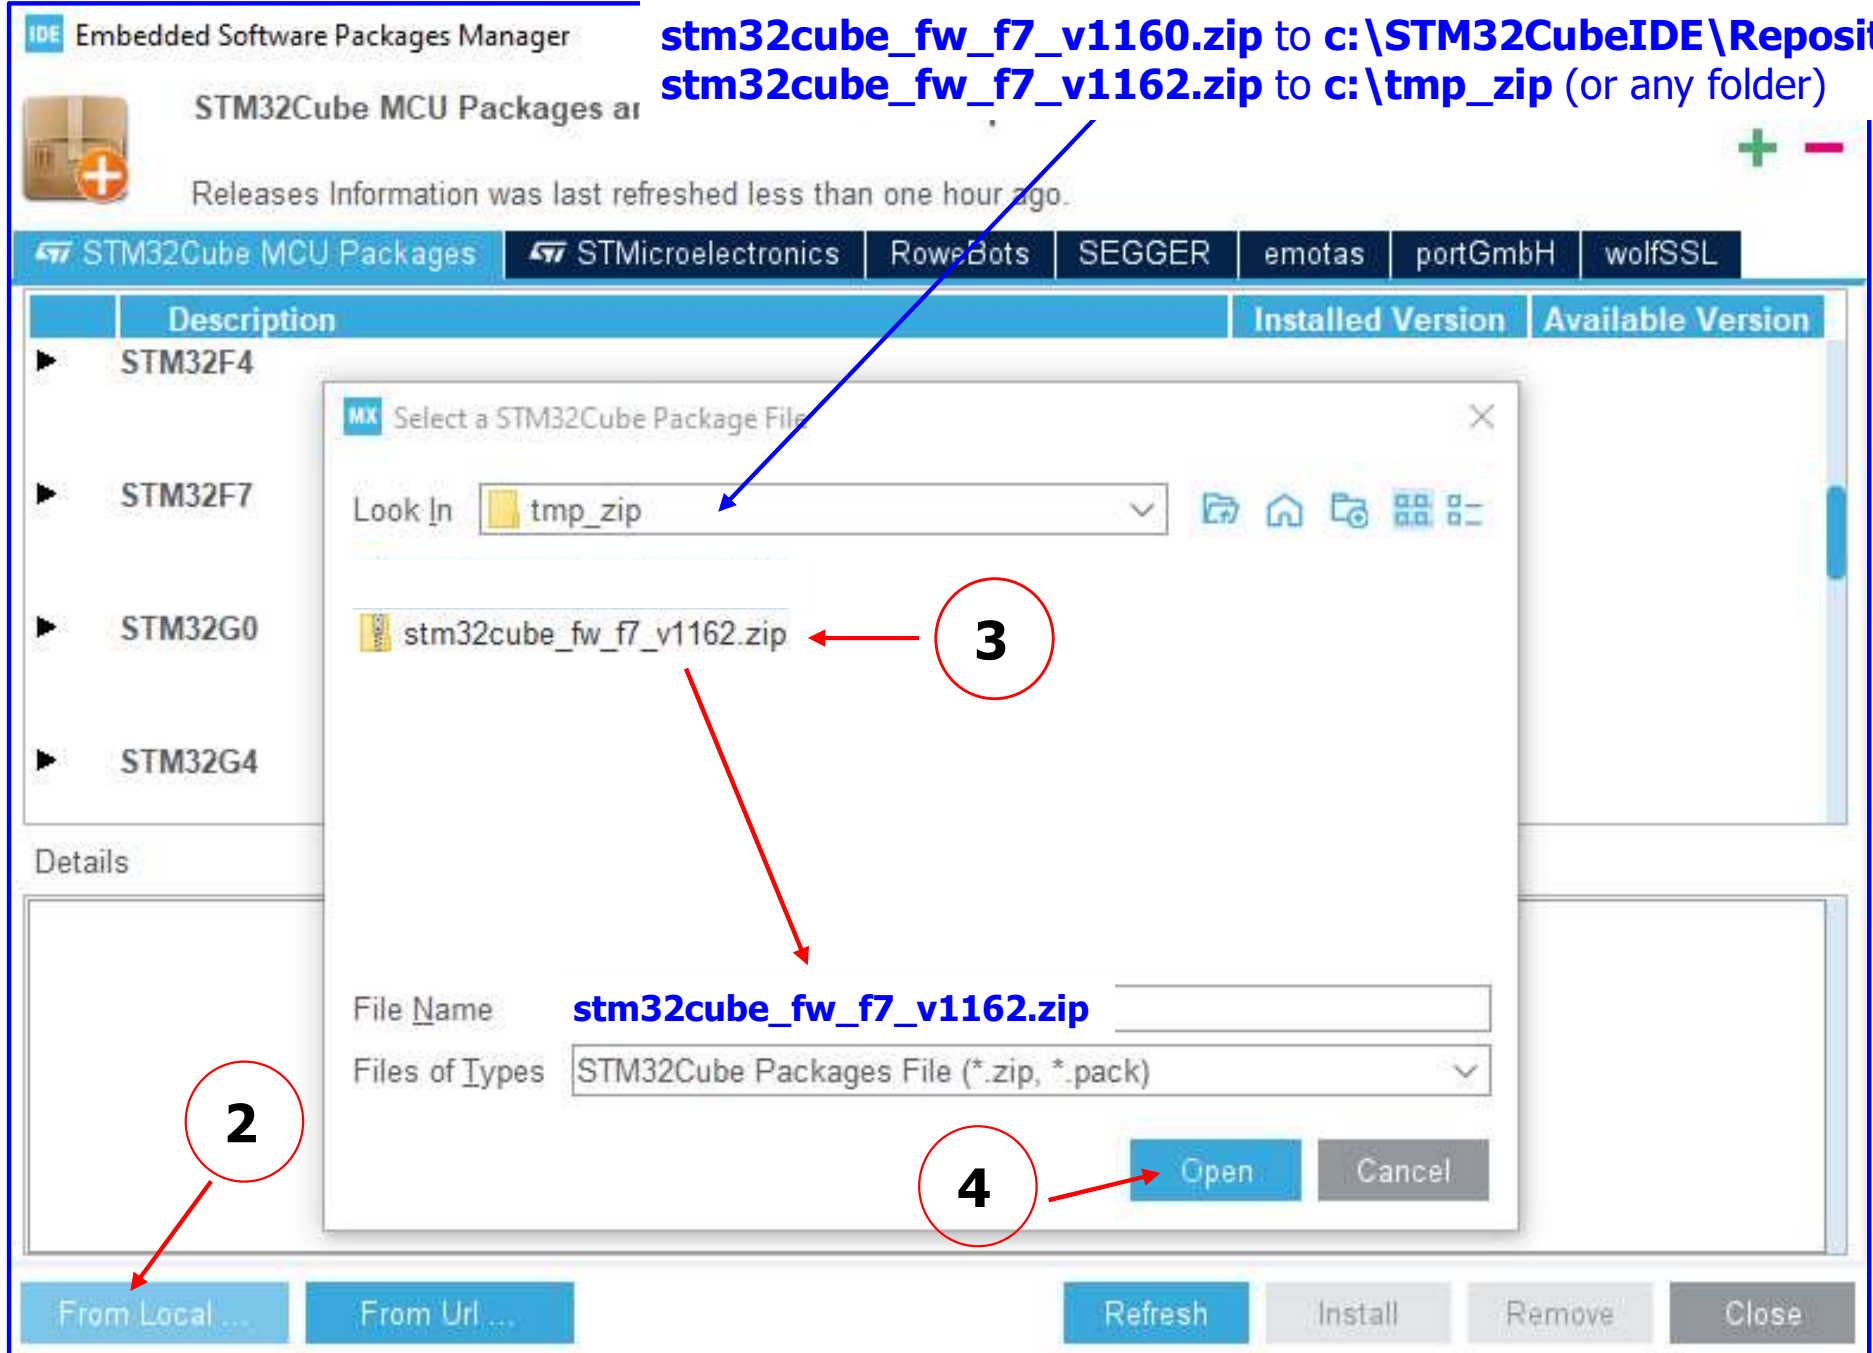

- Install STM32CubeIDE MCU Package Locally

First, copy the MCU packages to folders:

1

(do not unzip the files)

**stm32cube\_fw\_f7\_v1160.zip** to **c:\STM32CubeIDE\Repository**  
**stm32cube\_fw\_f7\_v1162.zip** to **c:\tmp\_zip** (or any folder)

## Software Installation

### 2. Use J-Link on-board instead of ST-Link on-board with the ST hardware via USB

- The steps for converting the ST-Link on-board to a J-Link on-board are:

- Make sure that the ST-Link USB drivers (STSW-LINK009) are installed.

Download: <https://www.st.com/en/development-tools/stsw-link009.html>

Unzip **en.stsw-link009.zip**, and run "**stlink\_winusb\_install.bat**"

- Make sure that the J-Link software package V5.12b or later (**JLink\_Windows\_V766a\_x86\_64.exe**) is installed (default settings).

Download: <https://www.segger.com/downloads/jlink/>

- Obtain the SEGGER J-Link software package (**STLinkReflash\_190812.zip**)

Download: [https://www.segger.com/downloads/jlink#STLink\\_Reflash](https://www.segger.com/downloads/jlink#STLink_Reflash)

- Unzip and start the **STLinkReflash.exe** utility
  - Agree to the license terms
  - Connect ST-Link on-board to PC
  - Select an option: "**Upgrade to J-Link**", "**Upgrade J-Link Firmware**", or "**Restore ST-Link**",
  - Wait for operation to complete

Info: <https://www.segger.com/products/debug-probes/j-link/models/other-j-links/st-link-on-board/>

# Software Installation

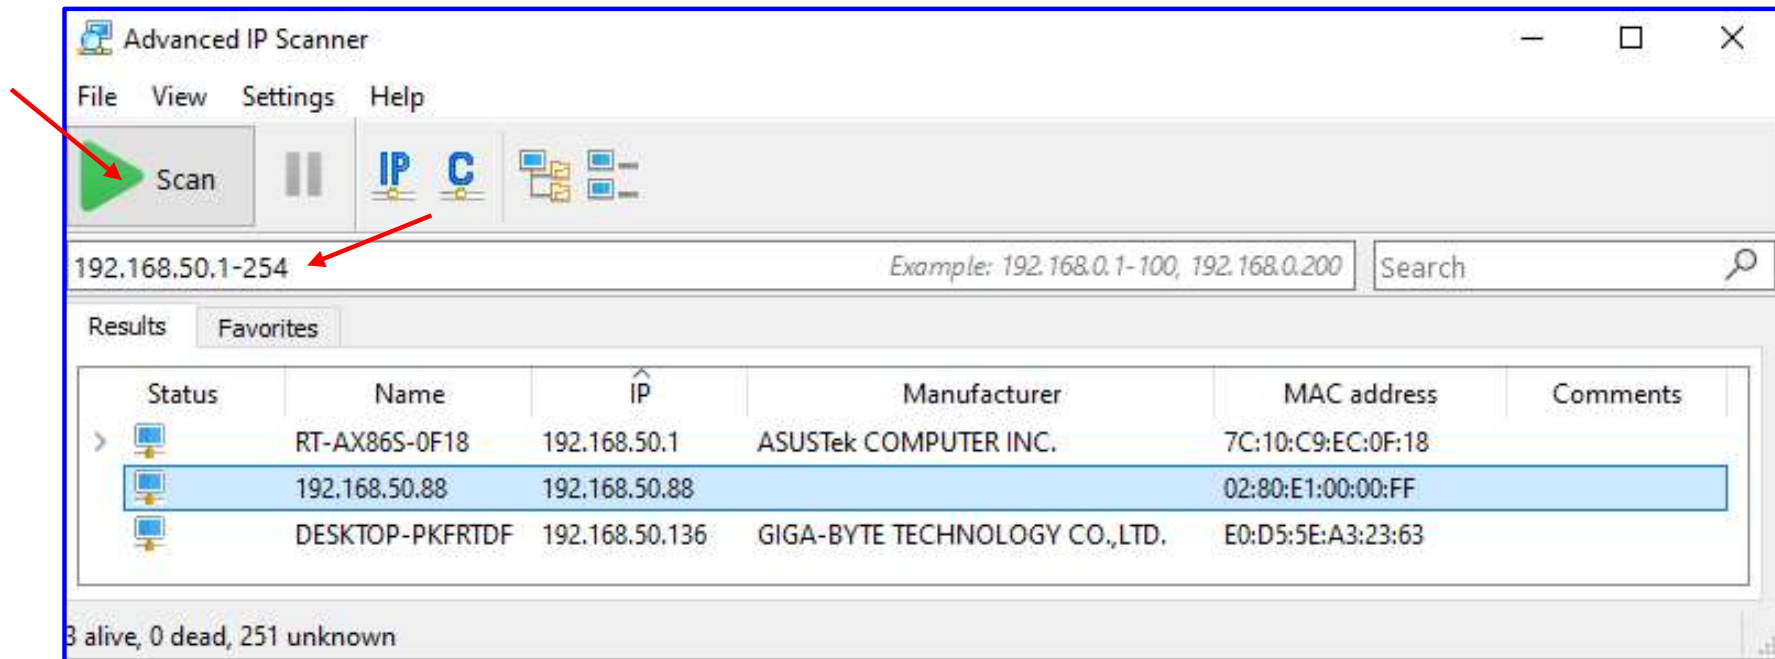

## 3. Other Software (1/2)

- **RealTerm** – A serial terminal for engineering and debugging
  - <https://sourceforge.net/projects/realterm/files/Realterm/2.0.0.70/>
  - **Realterm\_2.0.0.70\_Signed\_Wrapper\_setup.exe**
- **Notepad++** – A free source code editor
  - <https://notepad-plus-plus.org/downloads/>
  - **npp.8.4.1.Installer.x64.exe**
- **Sumatra PDF** – A free PDF, eBook (ePub, Mobi), XPS, DjVu, CHM, Comic Book (CBZ and CBR) reader for Windows
  - <https://www.sumatrapdfreader.org/download-free-pdf-viewer.html>
  - **SumatraPDF-3.4.3-64-install.exe**
- **7-Zip** – A file archiver with a high compression ratio
  - <https://www.7-zip.org/>
  - **7z2107-x64.exe**
- **SystemView** – An application that performs system analysis and verification of embedded systems
  - <https://www.segger.com/downloads/systemview/>
  - **SystemView\_Windows\_V332\_x64.exe**
- **EchoTool** – Command line echo server and client for Windows
  - <https://github.com/PavelBansky/EchoTool/>
  - **echotool.exe**
- **htmlgen** – A 'makefsdata' tool to create C code suitable for httpd for given html pages (or other files) in a directory
  - <https://github.com/fetisov/lrndis/tree/master/makefsdata>
  - **htmlgen.exe** (in lrndis-master.zip)

# Software Installation

## 3. Other Software (2/2)

- **Advanced IP Scanner** – Scan a network to obtain IP addresses
  - <https://www.advanced-ip-scanner.com/>
  - **Advanced\_IP\_Scanner\_2.5.4594.1.exe**

## Software Installation

### 4. USB-CAN FD adapter/analyzer

BM-USB-CANFD-X2

- Install **BUSMASTER\_Installer\_Ver\_3.2.2.21.exe** with default settings

# Software Installation
